- Aaltonen, V. T.
1950. Forest soil research in Finland. Unasylva IV(3): 116-121.
- Ableiter, J. Kenneth
1949. Soil classification in the United States. Soil Sci. 67:
183-191.
- Allison, L. E., and Reeve, R. C.
1955. Lysimeters for studying effects of salinity, leaching, and
position of water table on plant growth. Soil Sci. 79:
81-91, illus.
- Allmaras, R. R., and Gardner, C. O.
1956. Soil sampling for moisture determination in irrigation
experiments. Agron. Jour. 48: 15-17.
- Allyn, R. B.
1940. A rapid-action soil tube jack. Soil Sci. 50: 49-51.
-
1942. A calibrated soil probe for measuring field soil moisture.
Soil Sci. 53: 273-285.
- Andrews, L. A., and Broadfoot, W. M.
1958. The San Dimas soil core sampler. Soil Sci. 85: 297-301,
illus.
- Aronofsky, J. S., Stein, N., and Wallick, G. C.
1955. A new method of evaluating porosity and slip-corrected
permeability. Soil Sci. 79: 49-57, illus.
- Asghar, A. G., Qayyum, M. A., and Rana, G. M.
1957. A method for volumetric estimation of sulphates in soils
and irrigation water. Soil Sci. 83: 239-241, illus.
- Auten, John T.
1939. A forest soil research program for the central states.
Jour. Forestry 37: 153-156.
-
1940. A critical discussion of soil classification with special
reference to forests. Soil Sci. Soc. Amer. Proc. 5:
341-343.

Auten, John T.

1941. Notes on old-growth forests in Ohio, Indiana, and Illinois. U. S. Forest Serv. Cent. States Expt. Sta. Tech. Note 49, 8 pp.

and Plair, T. B.

1949. Forests and soils. U. S. Dept. Agr. Yearbook 1949: 114-119.

Babcock, K. L., and Overstreet, Roy

1955. Thermodynamics of soil moisture: A new application. Soil Sci. 80: 257-263, illus.

Baver, L. D.

1949. Practical values from physical analyses of soils. Soil Sci. 68: 1-14, illus.

Bendixen, T. W., Hershberger, M. F., and Slater, C. S.

1948. A basis for classifying soil permeabilities. Jour. Agr. Res. 77: 157-168.

Benton, George S., and Dominitz, Jack

1956. Measuring evapotranspiration from atmospheric data. Jour. Hydraulics Div., Amer. Soc. Civ. Engin. Proc. 82(1035): 1-26.

Berger, K. C., and Muckenhirn, R. J.

1945. Soil profiles of natural appearance mounted with vinylite resin. Soil Sci. Soc. Amer. Proc. 10: 368-370, illus.

Bernstein, Leon

1955. The needs and uses of water by plants. U. S. Dept. Agr. Yearbook 1955: 18-25.

Blake, George R., and Corey, Arthur T.

1951. Low-pressure control for moisture-release studies. Soil Sci. 72: 327-331, illus.

Blaney, Harry F.

1952. Consumptive use of water--definitions, methods, and research data. Amer. Soc. Civ. Engin. Trans. 117.

-
1952. Determining evapotranspiration by phreatophytes from climatological data. Amer. Geophys. Union Trans. 33: 61-66.

Bliss, E. S., and Johnson, C. E.

1952. Some factors involved in ground-water replenishment. Amer. Geophys. Union Trans. 33: 547-558.

Bloodworth, M. E., and Cowley, W. R.

1951. The use of undisturbed soil cores for permeability and infiltration determinations. Agron. Jour. 43: 4-9.

_____, Page, J. B., and Cowley, W. R.

1955. A thermoelectric method for determining the rate of water movement in plants. Soil Sci. Soc. Amer. Proc. 19: 411-414, illus.

_____ and Page, J. B.

1957. Use of thermistors for the measurement of soil moisture and temperature. Soil Sci. Soc. Amer. Proc. 21: 11-15, illus.

Bonar, A. J.

1949. A rapid method for determining the moisture content of soils. Tex. A. & M. Col. Res. Rpt. 9.

Bond, W. E., and Bull, Henry

1946. Rapid growth indicates forestry opportunities in bottom-land hardwoods. South. Lumberman 172(2154): 54-56, 58, 60, 62.

Bourget, S. J., Elrick, D. E., and Tanner, C. B.

1958. Electrical resistance units for moisture measurements: their moisture hysteresis, uniformity, and sensitivity. Soil Sci. 86: 298-304, illus.

Bouyoucos, George John

1947. A new electrical resistance thermometer for soils. Soil Sci. 63: 291-298, illus.

_____ 1947. Capillary rise of moisture in soil under field conditions as studied by the electrical resistance of plaster of paris blocks. Soil Sci. 64: 71-81, illus.

_____ 1949. Nylon electrical resistance unit for continuous measurement of soil moisture in the field. Soil Sci. 67: 319-330, illus.

_____ 1952. Methods for measuring the moisture content of soils under field conditions. Natl. Res. Council, Highway Res. Bd. Spec. Rpt. 2: 64-74.

_____ 1953. An improved type of soil hydrometer. Soil Sci. 76: 377-378, illus.

Bouyoucos, George John

1953. Capillary rise of water in soils under field conditions.
Jour. Phys. Chem. 57: 45-49.

-
1954. New type electrode for plaster of paris moisture blocks.
Soil Sci. 78: 339-342, illus.

-
1956. Improved soil moisture meter. Agr. Engin. 37: 261-262.

and Mick, A. H.

-
1948. A fabric absorption unit for continuous measurement of
soil moisture in the field. Soil Sci. 66: 217-232,
illus.

Bower, C. A., and Huss, R. B.

1948. Rapid conductometric method for estimating gypsum in
soils. Soil Sci. 66: 199-204.

Bradfield, R.

1946. Where are the new discoveries in soil science leading?
I. The physical chemistry of soil-plant relationships.
Soil Sci. Soc. Amer. Proc. 11: 3-8.

-
1950. Soil structure. Fourth Internatl. Cong. Soil Sci. Trans.
II: 9-19.

-
1952. Water--life blood of your soil! What's New in Crops and
Soils 5(1), 15 pp.

Brawan, Hans, and Kohnke, Helmut

1952. Microclimate and water vapor exchange at the soil surface.
Soil Sci. Soc. Amer. Proc. 16: 195-198, illus.

Bray, Roger H.

1954. A nutrient mobility concept of soil-plant relationships.
Soil Sci. 78: 9-22, illus.

Breazeale, Edward, and McGeorge, W. T.

1949. A new technic for determining wilting percentage of soil.
Soil Sci. 68: 371-374, illus.

_____, McGeorge, W. T., and Breazeale, J. F.

-
1951. Nutrition of plants considered as an electrical phenomenon--
a new approach. Soil Sci. 71: 371-375, illus.

Broadfoot, W. M.

1954. Procedures and equipment for determining soil bulk density.
U. S. Forest Serv. South. Forest Expt. Sta. Occas.
Paper 135: 2-11, illus.

Broadfoot, W. M.

1954. Core vs. bulk samples in soil-moisture tension analysis.
U. S. Forest Serv. South. Forest Expt. Sta. Occas.
Paper 135: 22-25.

-
1958. A method of measuring water use by forests on slowly
permeable soils. Jour. Forestry 56: 351.

and Burke, Hubert D.

-
1958. Soil-moisture constants and their variation. U. S. Forest
Serv. South. Forest Expt. Sta. Occas. Paper 166,
27 pp., illus.

Bryant, J. C., Bendixen, T. W., and Slater, C. S.

1948. Measurement of the water-stability of soils. Soil Sci.
65: 341-345.

Buck, C. C., and Hughes, J. E.

1939. The solvent distillation method for determining the
moisture content of forest litter. Jour. Forestry
37: 645-651.

Burd, John S.

1947. Mechanisms of release of ions from soil particles to
plant. Soil Sci. 64: 223-225.

Burger, D.

1957. Identification of forest soils on aerial photographs.
Forestry Chron. 33: 54-60.

Carlson, Charles A., and Pierce, R. S.

1955. The field maximum moisture content. Soil Sci. Soc. Amer.
Proc. 19: 81-83, illus.

Chen, C. T., and Hua, M.

1947. Mechanical analysis of soils by means of a common hydrometer.
Soil Sci. 64: 389-398, illus.

Chepil, W. S.

1950. Methods of estimating apparent density of discrete soil
grains and aggregates. Soil Sci. 70: 351-362, illus.

Chesnin, Leon, and Johnson, W. C.

1950. Application of centrifugal force to obtain a saturation
extract of soil suitable for flame photometric analy-
sis. Soil Sci. 69: 497-498.

Childs, E. C.

1940. The use of soil moisture characteristics in soil studies.
Soil Sci. 50: 239-252.

Clarke, G. R.

1951. The evaluation of soils and the definition of quality classes from studies of the physical properties of the soil profile in the field. Jour. Soil Sci. 2: 50-60.

Cline, Marlin G.

1949. Basic principles of soil classification. Soil Sci. 67: 81-91.

Closs, R. L.

1954. A rapid method for calibrating soil moisture elements of the porous block type. Soil Sci. 78: 333-338, illus.

Collis-George, N.

1952. A note on the pressure plate-membrane apparatus. Soil Sci. 74: 315-322.

Colman, E. A.

1947. A laboratory procedure for determining the field capacity of soils. Soil Sci. 63: 277-283, illus.

-
1953. Vegetation and watershed management. Ronald Press Co., New York. 412 pp., illus.

Crawford, C. B.

1952. Soil temperatures, a review of published records. Natl. Res. Council, Highway Res. Bd. Spec. Rpt. 2: 17-41.

Day, Paul R.

1950. Physical basis of particle size analysis by the hydrometer method. Soil Sci. 70: 363-374, illus.

DeBoodt, M. F., and Kirkham, Don

1953. Anisotropy and measurement of air permeability of soil clods. Soil Sci. 76: 127-133, illus.

De Plater, C. V.

1955. A portable capacitance-type soil moisture meter. Soil Sci. 80: 391-395, illus.

Davidson, S. E., and Page, J. B.

1956. Factors influencing swelling and shrinking in soils. Soil Sci. Soc. Amer. Proc. 20: 320-324, illus.

Dhawan, C. L., Dhand, A. D., and Sharma, R. N.

1952. A simple apparatus for measuring the shrinkage factor of soils. Jour. Sci. and Indus. Res. 11B: 82-84.

- Doeksen, J.
1950. An electrical method of sampling soil for earthworms.
Fourth Internatl. Cong. Soil Sci. Trans. II: 129-131.
- Dortignac, E. J.
1950. A simple volume-weight sampler and procedure. Soil Sci.
69: 95-105, illus.
- Doss, B. D., and Broadfoot, W. M.
1954. Terminal panels for electrical soil-moisture instruments.
U. S. Forest Serv. South. Forest Expt. Sta. Occas.
Paper 135: 30-31, illus.
- Edelman, C. H.
1952. Soils. Soil Sci. 74: 15-20, illus.
- Edlefsen, N. E., and Smith, W. O.
1944. The determination of moisture in undisturbed soil.
Soil Sci. Soc. Amer. Proc. 8: 112-115.
- Fehlmann, H. B.
1953. Big scale catchment of subsoil water. Internatl. Comn.
Irrig. and Drain. Ann. B: 74-75.
- Ferguson, E. R., Voigtel, R. M., and Smith, J. L.
1956. A portable power-driven soil sampler. Soil Sci. 81:
419-421, illus.
- Fieldes, M., King, P. J. T., Richardson, J. P., and Swindale, L. D.
1951. Estimation of exchangeable cations in soils with the
Beckman flame spectrophotometer. Soil Sci. 72:
219-232, illus.
- Fisk, H. N.
1944. Geological investigation of the alluvial valley of the
lower Mississippi River. Miss. River Comn., Vicks-
burg, Miss., 78 pp. (maps)
-
1947. Fine-grained alluvial deposits and their effects on
Mississippi River activity. U. S. Army Corps Engin.,
Waterways Expt. Sta. Rpt. (2 vol.)
- Fletcher, Peter W.
1957. A device for rapid field measurement of a soil's water
transmission rate. Soil Sci. Soc. Amer. Proc. 21:
561-562, illus.
- Fluker, B. J.
1958. Soil temperatures. Soil Sci. 86: 35-46, illus.

Forest Soils Committee of the Douglas Fir Region

1953. Sampling procedures and methods of analysis for forest soils. Univ. Wash., 38 pp.

Fox, C. S.

1951. Water; a study of its properties, its constitution, its circulation on the earth, and its utilization by man. Tech. Press, London. 148 pp.

Fox, Robert E.

1957. A proposed method for estimating reduction of available moisture in saline soils. Soil Sci. 83: 449-454, illus.

Fraser, D. A.

1956. The translocation of minerals in trees. Canada Dept. of N. Affairs and Nat. Resources, Forestry Branch, Forest Res. Div. Tech. Note 47, 16 pp.

Gardner, Robert A., and Lyford, W. H.

1955. The status and needs for soil survey in forested land. Soil Sci. Soc. Amer. Proc. 19: 91-93.

and Wieslander, A. E.

1957. The soil-vegetation survey in California. Soil Sci. Soc. Amer. Proc. 21: 103-105.

Gardner, W. R.

1958. Some steady-state solutions of the unsaturated moisture flow equation with application to evaporation from a water table. Soil Sci. 85: 228-232, illus.

and Brooks, R. H.

1957. A descriptive theory of leaching. Soil Sci. 83: 295-304, illus.

Gardner, Wilford, and Kirkham, Don

1952. Determination of soil moisture by neutron scattering. Soil Sci. 73: 391-401, illus.

Gardner, Willard, and Gardner, John Hale

1954. Vapor losses from the pressure membrane apparatus. Soil Sci. 78: 411-414.

Garton, James E., and Crow, Frank R.

1954. Rapid methods of determining soil moisture. Agr. Eng. 35: 486-487, 491.

Geiger, R.

1952. [Instruction of forestry students in meteorology in the light of the present educational crisis.] Forstwiss Cbl. 71 (11/12): 380-384. [In German.]

Giesecking, J. E.

1949. The clay minerals in soils. Adv. in Agron. I: 159-204.
Academic Press, New York.

Gilbert, M. J., and Van Bavel, C. H. M.

1954. A simple field installation for measuring maximum evapo-
transpiration. Amer. Geophys. Union Trans. 35: 937-942.

Goodrich, R. D.

1956. Methods of determining consumptive use of water in irri-
gation. Jour. Irrig. and Drain. Div., Amer. Soc.
Civil Engin. Proc. 82(884): 1-14.

Goodwin, K. R., and Langley, M. N.

1946. Procedure for determining moisture retention as used in
land classification. U. S. Bur. Reclam., Yuma, Ariz.

Graham, E. R.

1948. Determination of soil organic matter by means of a
photoelectric colorimeter. Soil Sci. 65: 181-183,
illus.

Grillot, G.

1954. The biological and agricultural problems presented by
plants tolerant of saline or brackish water and the
employment of such water for irrigation. United
Nations Ed. Sci. and Cult. Organ. Arid Zone Programme,
April 1954: 9-35.

Grover, Ben L.

1955. Simplified air permeameters for soil in place. Soil
Sci. Soc. Amer. Proc. 19: 414-418, illus.

Gurr, C. G., Marshall, T. J., and Hutton, J. T.

1952. Movement of water in soil due to a temperature gradient.
Soil Sci. 74: 335-345, illus.

Guttenberg, Sam, and Putnam, John A.

1951. Financial maturity of bottomland red oaks and sweetgum.
U. S. Forest Serv. South. Forest Expt. Sta. Occas.
Paper 117, 26 pp., illus.

Haise, H. R., and Kelley, O. J.

1950. Causes of diurnal fluctuations of tensiometers. Soil Sci.
70: 301-313, illus.

Hancock, C. Kinney, and Burdick, Robert L.

1957. Rapid determination of water in wet soils. Soil Sci. 83:
197-205, illus.

- Hanks, R. J., Holmes, W. E., and Tanner, C. B.
1954. Field capacity approximation based on the moisture-transmitting properties of the soil. Soil Sci. Soc. Amer. Proc. 18: 252-254, illus.
- Hardy, F.
1923. The physical significance of the shrinkage coefficient of clays and soils. Jour. Agr. Sci. 8: 243-264.
- Harrold, Lloyd L.
1952. Use of soil porosity for water conservation. Agr. Eng. 33: 287-289, 292.
- _____ and Dreibelbis, F. R.
1945. An accounting of the daily accretion, depletion, and storage of soil-water as determined by weighing monolith lysimeters. Amer. Geophys. Union Trans. 26: 283-297.
- Hemwall, John B., and Low, Philip F.
1956. The hydrostatic repulsive force in clay swelling. Soil Sci. 82: 135-145, illus.
- Hendrix, T. M., and Colman, E. A.
1951. Calibration of fiberglas soil-moisture units. Soil Sci. 71: 419-427, illus.
- Hilgard, E. W.
1860. Report on the geology and agriculture of the State of Mississippi.
- Hoover, M. D., and Lunt, H. A.
1952. A key for the classification of forest humus types. Soil Sci. Soc. Amer. Proc. 16: 368-370, illus.
- Hosoi, M., and Manabe, T.
1954. A method of micro-measurement of stem diameter growth (measurement of current daily increment of paulownia). Jour. Jap. Forestry Soc. 36(2): 54-56.
- Hudson, H. E., Jr., and Stall, J. B.
1952. Getting the facts through surveys and investigations. Jour. Soil and Water Conserv. 7(1): 11-16.
- Huff, F. A.
1956. Standard versus small-orifice raingages. Agr. Engin. 37: 108.

- Hunter, Albert S., and Kelley, Omer J.
1946. A new technique for studying the absorption of moisture and nutrients from soil by plant roots. Soil Sci. 62: 441-450, illus.
- Hursh, C. R.
1946. The eastern forester and his watersheds. Jour. Forestry 44: 1037-1040.
- Husch, B.
1956. Use of age at d.b.h. as a variable in the site index concept. Jour. Forestry 54: 340.
- Jackson, M. L.
1958. Soil chemical analysis. Prentiss-Hall, Inc. 498 pp., illus.
- Jacob, Walter C., and Klute, Arnold
1956. Sampling soils for physical and chemical properties. Soil Sci. Soc. Amer. Proc. 20: 170-172, illus.
- Jamison, Vernon C.
1957. Make full use of stored soil moisture. Jour. Soil and Water Conserv. 12: 122-125.
- _____
1958. Sand-silt suction column for determination of moisture retention. Soil Sci. Soc. Amer. Proc. 22: 82-83, illus.
- _____
and Reed, I. F.
1949. Durable asbestos tension tables. Soil Sci. 67: 311-318, illus.
- _____, Weaver, H. A., and Reed, I. F.
1950. A hammer-driven soil-core sampler. Soil Sci. 69: 487-496, illus.
- Jeffries, Charles D.
1947. The mineralogical approach to some soil problems. Soil Sci. 63: 315-320.
- Jenny, Hans
1950. Causes of the high nitrogen and organic matter content of certain tropical forest soils. Soil Sci. 69: 63-69, illus.
- Joffe, J. S., and Elson, Jessie
1955. Conductivity of soil-water extract as an index of soil structure. Plant and Soil 6: 84-91.

THE UNIVERSITY OF CHICAGO
DIVISION OF THE PHYSICAL SCIENCES
DEPARTMENT OF CHEMISTRY

PROF. J. H. VAN VLECK
1155 S. MICHIGAN AVE.
CHICAGO, ILL.

Dear Sir:
I have the pleasure to acknowledge the receipt of your letter of the 10th inst.

and in reply to inform you that the same has been forwarded to the proper authorities for their consideration.

I am, Sir, very respectfully,
Yours very truly,
J. H. VAN VLECK

Enclosed for you are two copies of the report of the Committee on the Proposed Revision of the Nomenclature of Organic Chemistry.

I am, Sir, very respectfully,
Yours very truly,
J. H. VAN VLECK

Very truly yours,
J. H. VAN VLECK

Enclosed for you are two copies of the report of the Committee on the Proposed Revision of the Nomenclature of Organic Chemistry.

I am, Sir, very respectfully,
Yours very truly,
J. H. VAN VLECK

Very truly yours,
J. H. VAN VLECK

1956. Water in relation to plant growth. Jour. S. Africa Forestry Assoc. 27: 36-42.

Wiersum, L. K.

1957. The relationship of the size and structural rigidity of pores to their penetration by roots. Plant and Soil IX(1): 75-85.

Wilcox, J. C.

1939. Soil moisture studies. I. Some factors affecting the moisture holding capacity and its determination. Sci. Agr. 20: 140-149.

_____ and Spilsbury, R. H.

1941. Soil moisture studies. II. Some relationships between moisture measurements and mechanical analysis. Sci. Agr. 21: 459-472.

_____ and Spilsbury, R. H.

1941. Soil moisture studies. III. An application of soil moisture measurements to soils classification. Sci. Agr. 21: 473-478.

Wilde, S. A.

1934. Soil reaction in relation to forestry and its determination by simple tests. Jour. Forestry 32: 411-418.

1954. Mycorrhizal fungi: Their distribution and effect on tree growth. Soil Sci. 78: 23-31.

, Brener, W. H., and Krumm, C. J.

1946. Types of composted fertilizer used in forest nurseries. Soil Sci. Soc. Amer. Proc. 11: 508-510, illus.

and Leaf, A. L.

1955. The relation between the degree of soil podzolization and the composition of ground cover vegetation. Ecol. 36: 19-22.

and Pronin, D. T.

1949. Growth of trembling aspen in relation to ground water and soil organic matter. Soil Sci. Soc. Amer. Proc. 14: 345-347, illus.

, Whitford, P. B., and Youngberg, C. T.

1948. Relation of soils and forest growth in the driftless area of southwestern Wisconsin. Ecol. 29: 173-180, illus.

, Steinbrenner, E. C., Pierce, R. S., Dosen, R. C., and Pronin, D. T.

1953. Influence of forest cover on the state of the ground water table. Soil Sci. Soc. Amer. Proc. 17: 65-67, illus.

Williams, D. E.

1954. Water table level as an indicator of drought conditions. Forestry Chron. 30: 411-416.

Wind, G. P.

1955. Capillary rise of moisture in a heavy clay soil. Netherlands Jour. Agr. Sci. 3(1): 60-69.

Wittich, W.

1953. Litter decomposition on soil by heavy earthworm activity. Schriftenreihe forstl. Fak. Univ. Gottingen 9: 7-33.

Woodruff, C. M.

1941. Soil moisture and plant growth in relation to pH. Soil Sci. Soc. Amer. Proc. 5: 36-41.

Work, R. A., and Lewis, M. R.

1935. Pear root concentration in relation to soil moisture extraction in heavy clay soil. Jour. Agr. Res. 50: 975-988.

and Lewis, M. R.

1936. The relation of soil moisture to pear tree wilting in heavy clay soil. Jour. Amer. Soc. Agron. 28: 124-134.

Wright, K. H., and Lauterbach, P. G.

1958. A 10-year study of mortality in a Douglas-fir saw-timber stand in Coos and Douglas Counties, Oregon. U. S. Forest Serv. Pacific Northwest Forest and Range Expt. Sta. Res. Paper 27, 29 pp., illus.

Yamaoka, Yoshito

1958. The total transpiration from a forest. Amer. Geophys. Union Trans. 39: 266-272.

Yeager, Lee E.

1949. Effects of permanent flooding in a river-bottom timber area. Ill. Natl. Hist. Survey Bul. 25, Art. 2, 65 pp., illus.

Young, T. W.

1953. Soil moisture relations in the coastal citrus areas of Florida. Fla. Agr. Expt. Sta. B 526, 48 pp.

Youngberg, C. T.

1955. Effect of soils on the establishment of tree crops. Soil Sci. Soc. Amer. Proc. 19: 86-90.

and Scholz, H. F.

1949. Relation of soil fertility and rate of growth of mixed oak stands in the driftless area of southwestern Wisconsin. Soil Sci. Soc. Amer. Proc. 14: 331-332, illus.

Zahner, Robert

1955. Soil water depletion by pine and hardwood stands during a dry season. Forest Sci. 1: 258-264.

1956. Root development of thinned pines. U. S. Forest Serv. South. Forest Expt. Sta. South. Forestry Notes 101.

1958. Hardwood understory depletes soil water in pine stands. Forest Sci. 4: 178-184, illus.

Zingg, A. W.

1943. Estimating the moisture content of the 0- to 6-inch soil horizon from climatic data. Soil Sci. Soc. Amer. Proc. 8: 109-111.

Zohary, M., and Weisel, Y.

1956. The ecology of non-irrigated cultivated forest trees. La-Yaaran 6(3/4): 4-7, 32-33.
